## IT'S TIME TO ENTER GOA CARBON

Goa carbon given very good break after 13 years of consolidation @ 100 levels and soothed immediately to Rs 140 levels and retested 100 levels .

we feel its the time to enter goa carbon for long term gains at this levels

Target for the stock in 12- 18 months is 180 and then 280....hold tight with patience..... be patient while invested in such low volume stocks ....
